

Eco-Card

Sanitary Waste Neutralizer

A blend of natural biocidal compounds and biodegradable materials, combined with vapor release technology, produces this highly effective, long lasting and eco-friendly sanitary waste neutralizer.

Environmentally Friendly

- *Made using recycled materials to minimize the impact of the product on the environment. The Eco-Card is made from a 100% biodegradable composite formulated with cellulosic fibers of wood pulp and recycled bleached softwood pulp.*
- *A natural blend of biocides and fragrances derived from extracts of plants belonging to the Lauraceae and Myrtaceae families.*

Naturally Effective

- *The Eco-Card works via vapor action to neutralize the sanitary waste in the disposal unit. The anti-microbial vapors permeate the entire unit, and as such, are effective even when the unit is used to its maximum capacity.*
- *The highly absorbent nature of the Eco-Card allows for the slow release of the active ingredients through vapor action, making the Eco-Card effective throughout the length of the service cycle.*
- *The Eco-Card has a natural fragrance that is fresh and long lasting.*
